B.S. Engineering Management

Missouri University of Science & Technology

Web Development Immersive

Galvanize – Denver
2016 - 2017

PROJECTS

[AngularJS Reddit Clone and REST API](#)

Technologies: AngularJS, Node.js, Express, PostgreSQL, HTML, CSS

- An AngularJS web application (and REST API) modeled after Reddit.com that allows users to read, create and update posts and add comments to posts.

[AngularJS Expense Manager and REST API](#)

Technologies: AngularJS, Node.js, Express, PostgreSQL

- An AngularJS(1.6) SPA and REST API for managing expenses.

["What Ales You" Web App and REST API](#)

Technologies: JavaScript, Node.js, Express, PostgreSQL, HTML, CSS, OAuth2.0

- 'What Ales You' is a full stack mobile first web-app and REST API that allows you to find nearby breweries, view their available beers and descriptions, and then rate and save the beers you have tried. Utilizes OAuth2.0 for fast and easy login.

["Foodie" Native Mobile App and REST API](#)

Technologies: React-Native, Redux, MongoDB, Node.js, Express

- A native mobile app and decoupled REST API that helps users make better dining decisions by allowing them to rate, save and recall their personal dining experiences including specific item ratings and reviews as well as general restaurant reviews, ratings and information brought into the app from the Yelp API.

SELECTED EXPERIENCE

WEB DEVELOPER

RBM Consulting, LLC – Denver, Colorado, 2010 – Current

Designed and developed web applications for small to medium clients.

Extensive JavaScript, jQuery, HTML5 and CSS3.
